Subject: Revised COE Application St. John Marina Yacht Club at Coral Bay, St. John

Please see the attached. Just let us know if you need anything else. I have gone into a lot of detail on the impacts/mitigation but I think that will be useful. And we have also include the maximum amount of riprap I can imagine we would need. Both the applicants and I were kind of shocked when you asked, for some reason all of us thought we weren't doing anything to the shoreline just planting mangroves. But since the engineers put it in we figure we best stay with it.

Also you will note that I have attached the application with the adjacent properties owners as part of the single scanned document and as two separate documents. I wasn't sure what would be best for you.
