Will follow up. However, the FWS is funding more than 50% of the project total so they should be responsible for the Consultation.

FYA.

Sindulfo:

Just received this email from Felix Lopez, FWS, regarding the Summer's End Marina in Coral Bay. Since you will be having a meeting with FWS headquarters next week, could you address this issue with him. The only thing I'm seeing here is the fact that if FWS removes the mooring fields from the summer's end marina project the consultation will have to be done by us. Also, will the impacts from the mooring field be added to the impacts from the marina. I think is a great idea to separate them, but don't know the repercussions this may have.

Please let me know what information and decision comes from the meeting. I think they just simply don't want to do the process for the marina.

JMS

Johann, as you know FWS Federal Aid is providing funding for part of the mooring field that is being proposed for the marina. Its a federal grant to DPNR for boat moorings. DPNR decided to allow the marina developers to manage the mooring field as part of the marina development.

The question is this. Who will be the lead agency for ESA consultation. FWS is funding a small and

essentially independent part of the project, but that funding action requires ESA. Since you can only consult once on a project should the DPNR mooring field be taken out of the Summer's End Marina proposal?
