Lisa:

Thank you, we appreciate the effort that went into evaluating and identifying the impacts of the proposed Marina. We will definitely take these into consideration should any further develop occur on either Marina.

Mike

Attached is the email with our comments provided to the Virgin Islands Department of Planning and Natural Resources Coastal Zone Management Division in response to the CZM request for comments for the Summers End Marina project in Coral Bay, St. John, as you requested. It is my understanding that there is now an additional marina project proposed in Coral Bay by the Moravian Church at the site of existing vessel launching and docking facilities in the bay. We will have to take this into consideration in terms of the potential for cumulative impacts to our trust resources if both projects move into the permitting phase.

Marilyn:

Can you please touch bases with Edwin, Johann, and Lisa and ask for a copy of their comments that they provided concerning the attached land and water permits by Summers End Group. It is my understanding that they provided comments to VI CZM concerning the project and it's their comments which will be evaluated prior to the CZM making a determination on a CZM permit.

Mike
