

To whom it may concern: CZM

As a sailing charter boat in Coral Bay I'd like to express my opinion addressing the mega marina proposal. I'm against this proposal for all the same reasons thousands of others are. Too big. Bad planning, killing our Ecosystem and if it does get built nature will destroy it and leave even a bigger mess in the bay than we already have with all the wrecked boats in the back of the harbor that never get removed. This group doesn't seem to care about anyone but themselves: making a fortune. I'd like to propose a plan for a small marquette.

On the other side of the bay where it's more protected we build floating docks and enough for about 20 cruising boats. Boats that want to stay in a slip for a couple nights and enjoy our island. Or if you need to pull in for a night or 2 to charge your batteries or just to get out of the swell for a bit. Showers , laundry services or drop off, small fuel dock, fill your water tanks, marine services. Also a place where boats can pull up to load/unload their provisions and crew/passengers, dive tanks and gear etc. For a good example you can check out Clarkescourtbaymarina.com in Grenada. Also with this proposal we ask again for help cleaning up all the sunken wrecks so we can have a clean beautiful harbor to enjoy as a small community.

Thank you and please consider.
