Thanks for the response - whether or not they had submitted was a question I had. They have indicated in their permit to VI DPNR that they have been in discussions with both ACE and NMFS and I am sure that part of the presentation this week indicated they had filed for the permit with your office. It has been represented that the DPNR and ACE permit review take place concurrently but it sounds like this is not the case at this point. I will reach out to Mr. Sasso when he gets back to see if he has any further and will send you the letter as mentioned above. Thank you for getting back to me - I fully understand the "scarce resources".

Mr. Fitzgerald,

Could you please provide me with more information as to when the project was submitted for our evaluation? Could not locate any files on St John Marina, Summers End Marina development group. Will have the Project Manager check into it once he becomes available next week. Sorry for my delayed response but we're tight up with limited resources available. Your letter with comments is always welcome and can be forwarded to me to the address referenced below. We'll take your comments into consideration once we determine the project and whether we have a permit application for our evaluation.

Thank you.

Good day Mr. Castillio

I had contacted your office earlier this week to reach out for information on the permit filed with your office by the St John Marina, Summers End Marina development group. I believe that the size and scope of project as proposed has the potential to lead to long term cumulative negative impacts on the natural/marine resources associated with Virgin Islands Coral Reef National Monument. I will be sending a letter to your office early next week expressing my concerns but would like to speak to the person in charge of the review prior to sending it please.

My direct extension is 242.

Thanks for your time and consideration.
