16. OTHER LOCATION DESCRIPTIONS, IF KNOWN (see instructions) State Tax Parcel ID See Attached Municipality Section - Township - Range -			

17. DIRECTIONS TO THE SITE

The project is located on the western side of Coral Harbor, approximately 1,000' south of the terminus of King Hill Road.

18. Nature of Activity (Description of project, include all features)

This project consists of construction of fixed docks as shown in the attached documentation to accommodate up to 145 vessels of varying length. Most of the vessels are expected to be transient, occupying a slip for a limited period of time. There is no dredging associated with this project. Dock construction will consist primarily of 15-inch coated-steel piles tied together with precast concrete pile caps supporting a grated decking to allow light penetration to the seabed below. Mooring piles will be either 12-inch or 15-inch diameter. Access to the marina will be via a single controlled walkway to the fixed docks. A public dinghy dock will be located midway between the shoreline and the first slip at the marina. This 20-foot by 40-foot dinghy dock will provide a safe docking area and allow ample public access to utilize adjacent businesses in the Coral Bay area. The Zone 1 docks will be a total of about 21,100 square feet (ft²), Zone 2 will be about 40,800 ft² and the main walkway will be a total of about 12,900 ft².

19. Project Purpose (Describe the reason or purpose of the project, see instructions)

The purpose of this project is to construct a marina with 145 slips of varying dimension. The project will also provide 12 moorings associated with the marina and with manage 75 moorings throughout Coral Harbor as a public private partnership with DPNR.

or
Linear Feet

23. Description of Avoidance, Minimization, and Compensation (see instructions)

The marina has been positioned deep enough to avoid dredging. The docks have been located to avoid the scattered corals. The docks have been position to avoid the densest areas of seagrass. The docks will use grated decking to minimize impacts to SAV. The project will be working to manage mooring in the bay through a public private partnership with DPNR and will be installing proper moorings throughout the bay. By cleaning up the improper moorings and debris the project will facilitate the recolonization by SAV. The project will be transplanting seagrass from piling footprints into impacted areas of the bay, the project will be making drainage (continued)
